Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-9, 11-14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansen (US 5,819,042).

3. Regarding claims 1-3, 6-9, 11-14 and 16, Hansen discloses a method apparatus and computer program (hereinafter collectively referred to as a system) for setup, configuring and managing network resources. The system comprises a configuration manager graphic user interface (GUI) (Fig. 4-7), which includes databases of network resources, topologies and protocols, i.e., accessing database of network connectivity, enabling network operators, managers or users to choose and configure and utilization the resources by conventional drag and drop feature (Fig. 8, 270 272; Col. 5, lines 9-26).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-5, 10 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen (US 5,819,042).

6. Regarding claims 4-5, 10 and 15, Hansen discloses the invention substantially, as claimed, as described in their base claims, including utilizing the configuration GUI for

configuring LAN WAN connectivity, but it is silent to applying the GUI for VLAN configuration. However, utilizing a system that is capable of configuring LAN, WAN to configure other type of network topology such as VLAN, would have been obvious to one of ordinary skilled in the art at the time of the invention was made that was a matter of utility choice, in which does not require any distinct limitations or producing any unexpected result.
